

Web Programming 3 - WEBD 221

In-class Assignment - September 9th, 2013

Assignment Overview:

The purpose of this assignment is to test your knowledge of concepts covered in semester 2

You will be responsible of creating your own Framework system that will allow you to create a basic blog. Your task is to use the provided code and create a responsive template that includes a header, navigation, main content area with articles, sidebar and a footer. You must include a web font from Google Fonts. The overall style aesthetic is up to you.

The basic structure will be available at

<https://github.com/drewminns/drewminns.github.io/blob/master/assets/assignments/week1/templatestructure.zip>

Be sure to include the 'Eric Meyers ResetCSS 2.0' stylesheet which is available from <http://www.cssreset.com/>.

For filler text, use Lorem Ipsum from <http://www.lipsum.com/>.

You will be allowed to use course materials and internet resources (ex. Google) but you must complete the assignment independently.

Due September 18th 2013 11:59pm

Submit a link to dminns@gmail.com when complete. Be sure to include all files used.

Marking Scheme:

Following syntax rules and organization /10pts

Semantic markup, proper HTML/CSS usage /15pts

Responsive Development /15pts

Total: 40pts
